Warmth you can count on!

Innovative Solutions for Your Thermal Comfort

Are you wondering how to efficiently use the limited space designated for a boiler room? Or maybe you are looking for a flexible and practical, mobile solution that will meet the requirements of the central heating system and hot water preparation? Choose the **MTM** container boiler room, model **BH** - specially designed to meet these needs.

Unmatched Quality and Personalization

For us and our clients, the flexibility of solutions and their adaptation to individual needs are a priority. Therefore, we offer options for purchasing, renting, or leasing our compact heating systems. As a leader in the field of mobile heating installations, **MTM** offers comprehensive services, from design through delivery to installation and commissioning.

Ready-to-Use Solutions

Our mobile container boiler rooms are constructed using the most modern production methods. Every step in the process is meticulously checked, allowing us to deliver the highest quality products. We are particularly proud of our collaboration with Lamborghini, a well-known burner manufacturer, which is a testament to our commitment to offering solutions of the highest standard. This partnership with a world-famous brand not only highlights the quality and reliability of our systems but also adds prestige through a recognizable mark of excellence in innovation and efficiency.

MTM BH series

Your individual heat source!

Flexibility and Accessibility

If you're in search of a unique solution for a mobile boiler room for hot water production and central heating, and you have limited space, MTM's containerized oil-fired boiler rooms are the perfect solution. All components necessary for heat generation are ready for use and installed within a pre-prepared structure, making the installation economical, easy, and fast.

Features

Our standard **BH** series containerized boiler rooms offer heating capacities ranging from **300/500/750 kW**, ensuring a solid and reliable heat source.

But that's not all!

For customers with special requirements, we offer the possibility of custom-made boiler rooms with a total capacity of up to **1200 kW**. Our containerized boiler rooms can serve as a source of central heating as well as for the purpose of preparing hot domestic water, delivering heat where it is most needed.

Advantages

By opting for our mobile unit, you avoid the high costs associated with operating a traditional boiler room. Our containerized boiler rooms are efficient, safe, and sustainable solutions that guarantee optimal boiler functionality. Our rich experience and knowledge enable us to provide professional advisory services, ensuring comprehensive care for every element of your system.

MTM BH Series

Your Comfort, Our Mission!
