

MOBILE ENERGY PLANTS

heating | air conditioning | ventilation

Core capabilities

Heating Systems: Offer diverse heating solutions catering to various needs, from traditional boilers to modern systems based on renewable energy sources.

Mobile Boiler Rooms: Portable units providing immediate heat and energy sources in temporary or emergency situations, ideal for construction sites, outdoor events, or crisis scenarios.

Water Treatment Plants: Provide comprehensive solutions for water purification, ensuring safety and quality for both industrial and domestic applications.

Special Purpose Containers: Containers customized for specific uses, such as mobile offices, laboratories, or hazardous material storage.

Heaters: Offer a variety of heater types, from traditional panels to modern designs utilizing solar energy.

Fans: Provide ventilation solutions for various spaces, from small residential rooms to large industrial halls.

Sanitary Containers: Offer portable and convenient sanitary-hygienic solutions for temporary locations, mass events, or construction sites.

ONZ Codes

- 40101701 - Air conditioners
- 72101511 - Air conditioning installation or maintenance or repair service
- 72151200 - Heating and cooling and air conditioning HVAC construction and maintenance service
- 72151207 - Heating and cooling and air conditioning HVAC installation and maintenance service
- 72101519 - Gas fitting installation service
- 72141120 - Sewer line construction service
- 81141807 - Plumbing or sewer inspection service
- 72101510 - Plumbing system maintenance or repair
- 72151100 - Plumbing construction services

Our products

Oil heaters

A high-precision, low-speed gear fuel pump, designed specifically for our devices taking into account specific conditions of use, pumps any type of oil, regardless of its density. Thanks to this, you do not have to check the density of the oil you have and you do not have to remember to select the appropriate operating mode - the pump installed in our devices pumps both thick used oils and thinner fuel oils and their mixtures.

Solid fuel heaters

The heater can be powered by any fuel (wood, coal, briquettes), and after installing a fan burner - also by gas, fuel oil, waste oil and pellets. Burners are available separately.

Mobile air heaters with a burner

MTM mobile heaters are a combination of modern solutions used in one device. They will quickly provide heat where climatic conditions require it. The specially designed and made of stainless steel combustion chamber and easy access to the heat exchanger enable the use of various burners, thanks to which we can use fuel oil, natural gas, LPG or, when using a Multi burner, used oil or alternative fuels such as KTS-F.

Mobile fans

We provide a huge selection of products. We offer both mains-powered and battery-powered models. The devices we distribute have adjustable rotation speed. They are suitable for working in many positions and angles.

Our assortment includes:

portable axial industrial fans on legs or wheels – relatively small in size,
rotary fans - support the operation of cooling, drying or heating devices,
professional floor fans with a cast iron base and adjustable height - characterized by a stylish design and high efficiency.

Past performance

Project scope	Investor	Contract implementation period	Value in USD
Production and assembly of a mobile heating container system for special applications	G-Con	December 2023	199000,00
Production and installation of precision air conditioning in the production hall	BIFORIUM Sp. z o. o.	January 2024	65700,00
Production and installation of precision air conditioning in the production hall	Miasto Stołeczne Warszawa	February 2024	42860,00
Production and installation of precision air conditioning in the production hall	U.S. Uniwersum / Święcki	March 2024	37400,00
Production and installation of precision air conditioning in the production hall	GRATO Sp. z o. o.	April 2024	28000,00
Production and installation of precision air conditioning in the production hall - medical industry	GRUPA INCO S.A.	November 2023	15000,00
Production and installation of a heating system	ZOELLER TECH	October 2024	9500,00
